Are You Saving Enough? (Too Much?)

Ninety-five per cent of Americans reach retirement age without enough income or assets to maintain their standard of living. Two percent of us end up with a lot more than we need - we should have spent more in earlier years. About 3% have done "just right".

If you are part of that 97%, please make an appointment for FREE retirement planning, regardless of your age. We can help you "even out" your spending over your lifetime and help you plan what you want to leave to your loved ones or charities.

Bring in a balance sheet, tax return (if we don't already have a copy), and any information regarding your expected pensions and social security. Call soon for an appointment: we're sending out 800 invitations; 776 of you do need this free service!

Mon-Wed-Fri at 12:00 for lunch, or 2:00 if you prefer to skip lunch, would be the best time for us. However, we will come in whenever you need us if these times are not convenient for you.

Sincerely,

Myron
